Mehfil-e-Zan

Gather. Grow. Glow.

SECURITY MEASURES STANDARD OPERATING PROCEDURES

Physical security, workplace safety and security incident procedures

Document ID	MEZ-SOP-002
Document title	Security Measures SOP
Version	1.0
Effective date	01 November 2026 (assumed)
Last review date	Not yet reviewed (first issue)
Next review date	01 November 2027
Document owner	Security Manager
Approval authority	CEO and Owner
Status	Draft for approval
Applies to	All employees, trainees, interns, visitors, vendors, contractors and guests at Mehfil-e-Zan premises

Student project note: *This document is a student project deliverable. Building layout, equipment, timings and retention periods are business assumptions. Fire and building safety rules, CCTV and privacy laws, and any rules on women-only premises must be checked for Karachi and Sindh, and reviewed by a qualified adviser, before a real business adopts them. Emergency numbers should be re-checked before they are printed and displayed.*

1. Purpose and Scope

1.1 Purpose

This SOP describes how Mehfil-e-Zan keeps its guests, staff, premises, assets and information safe. It covers who may enter and how, how assets and documents are protected, how CCTV is used, what to do in a fire or medical emergency, how incidents are reported and investigated, and how the cafe is opened and closed each day.

1.2 Scope

It applies to the Gulshan-e-Iqbal cafe, its entrances, kitchen, store room, guest and event areas, staff room and surroundings, and to events run off-site in the company's name. It applies to everyone present: staff, guests, visitors, vendors, delivery riders and contractors.

1.3 Business assumptions

- The cafe is a women-only space. Staff and guests are women. Children accompanying a guest, including boys up to 10 years old, may enter. The CEO may change this rule.
- The premises have a Main Entrance for guests and staff, and a separate Service Entrance for deliveries, vendors and technicians. At least one of these, or a separate rear door, serves as a marked emergency exit.
- The cafe opens daily from 10:00 AM to 10:00 PM. It seats 40 people. Staff shifts are 9:00 AM to 5:30 PM and 2:30 PM to 11:00 PM, as in the General Office SOP (MEZ-SOP-001).
- Cameras cover entrances, the service area, cash counter and store room, but not private or relaxed areas (Section 5).

1.4 Related documents

Document ID	Title	Link to this SOP
MEZ-SOP-001	General Office SOP	Conduct, shifts, escalation

MEZ-FRM-005	Security Incident Report	Reporting incidents
MEZ-FRM-010	Daily Operations Report	Opening and closing logs

2. Roles and Responsibilities

Role	Responsibilities under this SOP
Owner and CEO	Approve this SOP, provide resources, decide on police reports and banning of guests, and approve release of CCTV footage.

Role	Responsibilities under this SOP
Security Manager	Owns this SOP. Controls keys and access, runs the visitor system, manages CCTV with the IT Manager, leads safety checks, drills, training and incident investigations.
Operations Officer	Plans staffing so that two or more people open and close, schedules contractors and deliveries, and maintains equipment and first aid kits.
Supervisor	Acts as the shift security lead. Checks entrances, opening and closing logs and visitors, and manages incidents on shift until the Security Manager takes over.
Fire Warden and First Aider (trained staff)	Each shift has at least one trained Fire Warden and one trained First Aider, named on the shift roster, who lead evacuation and first aid.
IT Manager	Installs, maintains and secures CCTV and the alarm, controls access to the footage system and backs up recordings.
Finance Director	Controls cash handling, safe procedures and cash deposit rules.
HR / Sales / Marketing Manager	Supports staff involved in incidents, handles staff misconduct and grievances, and arranges safety training.
Documentation & Compliance Coordinator	Keeps records of drills, registers and incident reports, and tracks corrective actions.
All employees	Follow this SOP, wear ID, challenge and report unknown persons, keep exits clear, protect assets and report every incident or hazard.

3. Entry, Exit, Visitors and Access Control

3.1 Entrances and exits

Entrance	Purpose and rules
Main Entrance	Used by women guests, children with them and staff during opening hours. A host or the nearest staff member welcomes guests, and the entrance is kept visible and never blocked.
Service Entrance	Used for deliveries, supplier drops, waste collection, technicians and male visitors. It remains locked and is opened only by a staff member after checking who is there. It is never used by guests.
Emergency exit(s)	Marked, unlocked from inside during opening hours, and never blocked by furniture, stock or bins. Alarmed if installed.
Staff arrival and departure	Staff use the Main Entrance or Service Entrance as directed by the Supervisor, before opening and after closing, and sign in and out as required by MEZ-SOP-001.

3.2 Identification and keys

- Every employee wears a company ID badge with her photo, name and position while on duty. Lost badges are reported to the Security Manager at once and are cancelled.
- Keys, key cards and alarm codes are issued only by the Security Manager and recorded in the Key Register. Keys must not be copied, lent or taken home unless authorised (for example, for opening duty).
- The list of key holders is reviewed every quarter. Locks or codes are changed when a keyholder leaves, loses a key or is no longer authorised.

- Alarm codes and safe combinations are known only to named people. Codes are never written in public places or shared in group chats.

3.3 Guests

- Women guests, and children with them, enter freely and do not need to register. Members show their Mehfil Pass or Work & Sip card, or give their name at the host desk.
- Private and event bookings use a guest list prepared by the Marketing Executive, and the host checks names at the door.
- Guests are never searched. Staff may politely ask a guest to leave a large bag at a designated shelf, or to move it if it blocks an exit.
- Weapons, alcohol, drugs and smoking are not allowed on the premises. A sign at the entrance tells guests about this, and that photographing other guests without consent is not allowed.
- Guests who behave aggressively, harass anyone or break the rules are asked politely to stop. If they do not, they are asked to leave by the Supervisor. The Security Manager records a ban in the Security Incident Report, and the CEO decides on it.

3.4 Visitors, vendors and contractors

Visitor type	Entry and registration	Access and supervision
Female visitors, such as interviewees, suppliers' representatives, auditors, event instructors	Main Entrance. Sign in the Visitor Register (MEZ-FRM-003) with name, company, who they are meeting, purpose and times in and out. Check ID. Receive a visitor badge.	Escorted by the person they are visiting. Only in approved areas. Badge returned on leaving.
Male visitors, such as delivery riders, vendors, couriers, technicians, inspectors, landlord's staff	Service Entrance only. Register with name, company or platform, contact number, purpose and times. Check ID or company card. Badge issued if working inside.	Deliveries are handed over at the Service Entrance. They wait in the designated waiting area and never enter guest areas while the cafe is open. Escorted by a staff member at all times.
Contractors and technicians (repairs, installations)	Booked in advance with the Operations Officer, who checks the company and ID, and tells the Security Manager. Registered at the Service Entrance.	Work in guest areas only when the cafe is closed or the area is closed off, with at least two staff present. Urgent repairs during opening hours need the Supervisor's approval and an escort.
Government or authority officials (inspectors, police)	Ask for official ID and written authority. Contact the Security Manager and CEO.	Allowed access only to what they are legally entitled to see. Record the visit. Do not hand over guest data without the CEO's approval.
Emergency services	Admit immediately.	Staff guide them and give them access to the incident.

Visitor records are confidential and are kept for 12 months under the Master Document Register. The register records identity details only as needed; staff do not photocopy CNICs unless legally required. Unidentified persons who ask for entry are not admitted until the Supervisor has verified them.

3.5 Challenging unknown persons

- If someone appears in a staff-only area, politely ask who she or he is and who they are meeting. Take them back to the public area or Service Entrance and tell the Supervisor.

- Do not confront, restrain or chase anyone. If you feel unsafe, move away, alert a colleague and call the Supervisor. Call 15 if there is a threat.

4. Protection of Assets and Confidential Documents

4.1 Company assets

- All equipment of value, such as the espresso machine, grinders, POS, laptops, tablets, phones, CCTV recorder and furniture, is listed in the Asset Register kept by the IT Manager and the Operations Officer, with serial numbers and locations. The Security Manager checks it every 6 months.
- Portable valuables are kept in the locked cabinet when not in use. Laptops and tablets are never left in guest areas.
- Stock and supplies are kept in the locked store room. Only authorised staff hold keys. Stock is checked under the Operations SOP. Missing items are reported as an incident.
- Staff must not remove company property without written approval from the Operations Officer.
- Staff are provided with lockers for personal belongings. The company is not responsible for valuables left unsecured.

4.2 Cash handling

- The cash float is counted at opening and signed for. The till holds no more than the limit set by the Finance Director (assumed Rs. 20,000). Excess cash is moved to the safe.
- Cash is counted at closing by two staff members and recorded in the Daily Operations Report. Cash is never counted in view of guests.
- The safe is opened only by authorised staff. The daily takings are deposited in the bank as directed by the Finance Director, by approved methods and not on foot or alone at night.
- Any cash difference is reported to the Supervisor and Finance Director straight away.

4.3 Confidential documents

- Confidential documents, such as contracts, payroll, staff files and guest or member records, are kept in locked cabinets or in access-controlled cloud folders under the IT Policy.
- Follow a clean-desk rule. At the end of the day or when away from your desk, documents and notes are put away. Screens are locked.
- Documents are not left in printers, copied without need, photographed or taken off premises without permission.
- Unwanted confidential papers are shredded, not thrown into bins.

4.4 Lost property

- Items found are handed to the Supervisor, labelled with date, time and place, and recorded in the Lost Property Log. They are kept in the locked cabinet for 30 days.
- Items are returned only after the guest describes the item and shows ID. After 30 days, unclaimed items go to charity or are disposed of as the Supervisor directs, except for valuables or documents, which are given to the Security Manager.

5. CCTV and Monitoring Guidelines

CCTV is used to protect people, cash and property. It is not used to watch staff or guests continuously. The Owner must verify that its use meets Pakistani and Sindh law and any rules that apply to premises used only by women.

5.1 Where cameras are placed

	Locations
Cameras may cover	The Main Entrance and Service Entrance, the cash counter and safe area, the store room door, the kitchen passage and back-of-house corridor, and the outside of the building near the entrances.
Cameras are never placed	In washrooms, the prayer area, the staff rest or changing area, or any place where people expect privacy. Cameras are also not placed in the main seating, reading and event areas, because guests may be uncovered there.
Changes	The CEO must approve any new or moved camera in writing, after the Security Manager checks it against this section. Where a camera is ever approved in guest areas, guests are informed by clear signs and only named female staff may see the footage.

5.2 Rules

- Signs saying "CCTV in operation" are placed at the entrances. Staff are told about CCTV at induction.
- Live and recorded footage may be viewed only by the Security Manager and the CEO. The IT Manager may access the system only for maintenance. All viewing, export or sharing of footage is logged in the CCTV Access Log with date, person and reason.
- Footage is stored securely, access-controlled and kept for 30 days, then overwritten, as in the IT Policy. It is kept longer only if needed for an incident or investigation.
- Footage may be viewed for security incidents, theft, safety, disputes and investigations, and not for curiosity, entertainment or to monitor private conduct.
- Footage must never be copied to personal phones, shared in chat groups or posted on social media. Doing so is gross misconduct.
- Footage is given to the police or courts only on a valid request and with the CEO's written approval. Guests or staff who ask to see footage that includes them must apply in writing to the Security Manager, and others in it must be protected.
- Each month, the IT Manager checks that all cameras work and the time stamp is right. Faults are reported and repaired within 2 working days.

6. Workplace Safety

6.1 General safety rules

- Keep floors, aisles and exits clear. Wipe spills straight away and place a "wet floor" sign until dry.
- Wear non-slip, closed shoes. Use gloves and protective clothing when handling hot items, sharp tools or cleaning chemicals.
- Use hot equipment, such as steam wands, ovens, kettles and fryers, only after training. Carry hot drinks carefully, and never over guests' heads or children.

- Store knives safely. Store cleaning chemicals in their original labelled containers, away from food, and follow the label.
- Do not overload sockets or use damaged wires. Report electrical faults, and do not repair them yourself.
- Lift heavy items, such as milk crates and water bottles, safely, with a colleague or a trolley where needed.
- Report every hazard, near miss and injury to the Supervisor at once.
- Gas cylinders and appliances are kept in a ventilated place, checked for leaks and hoses at each opening, and serviced by qualified vendors.

6.2 Safety walk-through

The Security Manager completes a safety walk-through every month, checking exits, extinguishers, first aid kits, electrical points, gas, lighting, CCTV, signs and general housekeeping. Findings are recorded and fixed within the time set, and are tracked by the Documentation & Compliance Coordinator.

6.3 Staff safety after dark and while working alone

- At least two staff are present at all times, including opening and closing. No staff member opens or closes the cafe alone.
- The evening shift ends at 11:00 PM. The Operations Officer arranges safe transport for staff, such as a vetted ride service, pick-up by family or a driver, or escort to a vehicle. Staff are asked to inform the Supervisor when they have reached home safely.
- Staff leave together and are not left alone at the premises or on the street at closing.
- Staff must report any harassment, following, threats or unwanted attention from guests, delivery staff or others to the Supervisor immediately. They will be supported and no one will be punished for reporting.

6.4 Health and hygiene

Food safety, hygiene, temperature checks and allergen controls are set out in the Operations and Quality Control SOP. Staff who are ill with symptoms that could contaminate food must not handle food, as stated in the General Office SOP.

6.5 Staff and guest vulnerability

- Children are always supervised by the adults with them. Staff are not responsible for unaccompanied children. They do not take them out of sight, and call the guest's guardian or the Supervisor if a child is alone.
- Staff help elderly, pregnant or disabled guests to be seated and to evacuate if needed.

7. Emergency Evacuation and Fire Safety

7.1 Fire prevention

- Fire extinguishers suitable for kitchen and electrical fires, and a fire blanket in the kitchen, are installed where the fire department or an approved vendor advises, and are serviced once a year. Smoke detectors, if fitted, are tested monthly.
- Exit routes and exit signs are kept clear and lit. Floor plans showing exits, extinguishers and the assembly point are displayed in the staff room and kitchen.

- Stock, cardboard and waste are not kept near cooking equipment. Grease filters and extraction are cleaned on schedule.
- Electrical equipment is switched off when not in use and not overloaded. Candles and open flames are not used without the Security Manager's approval, such as for private events.
- Gas appliances are turned off at the valve at closing.
- All staff are trained on the use of extinguishers at induction and then annually. Fire wardens are given extra training.

7.2 What to do in a fire

1. **Alert.** Shout "Fire" and sound the alarm. Tell the Supervisor and the Fire Warden.
2. **Call.** The Supervisor or a nearby staff member calls the Fire Brigade (16) and Rescue 1122, gives the address and says whether people are inside.
3. **Fight only if safe.** Use an extinguisher or fire blanket on a small fire only if trained, your back is to an exit, and the fire is no bigger than a small bin. Otherwise leave at once.
4. **Evacuate.** Guide guests calmly through the nearest safe exit. Help children, pregnant, elderly and disabled guests first. Do not collect belongings and do not use lifts.
5. **Cut hazards.** If safe and quick, turn off gas at the valve and switch off main power. Do not take risks.
6. **Assemble and count.** Go to the assembly point at a safe distance across the street (to be marked on the floor plan). The Fire Warden checks staff against the shift roster and the Supervisor checks guests against bookings and the visitor register, and reports missing persons to the fire service.
7. **Stay out.** Nobody re-enters until the fire service says it is safe. The Supervisor informs the Security Manager and CEO at once.

7.3 Other emergencies

Emergency	Action
Gas leak (smell of gas)	Do not use switches, lighters or phones near the leak. Open doors and windows, close the gas valve if safe, evacuate everyone, and call 16 and the gas utility from outside.
Earthquake	Drop, cover and hold under sturdy furniture away from windows and shelves. After shaking stops, evacuate calmly, and check for injuries and gas.
Flooding or severe weather	Move guests away from low areas and glass. Switch off power if water nears sockets. Decide with the CEO whether to close early.
Prolonged power cut	Switch to the backup, keep exit routes lit with torches, and follow the Business Continuity Plan.
Threat, violence or unrest nearby	Lock doors, keep guests calm and away from windows, call 15, and follow police instructions. Do not confront anyone.
Suspicious package	Do not touch or move it. Clear the area, call 15, and inform the Security Manager.

7.4 Drills and training

- A fire evacuation drill is held at least every 6 months, once for each shift, and the results are recorded: time to evacuate, issues and actions.
- New staff are shown the exits, extinguishers, first aid kit and assembly point on their first day.

8. First Aid and Emergency Contacts

8.1 First aid arrangements

- A first aid kit is kept in the kitchen and at the host desk, and a burns kit near the espresso bar. The Security Manager checks contents each month and replaces used or expired items.
- At least one trained First Aider is on every shift, named on the roster. Training is refreshed every 2 years.
- First aiders give basic first aid only. They do not diagnose or give medicines. They call 1122 or 115 for anything serious.

8.2 Common situations

Situation	Basic action
Burns and scalds	Cool the burn under cool running water for 20 minutes. Remove tight items, cover loosely with a clean non-fluffy dressing and do not burst blisters or apply creams. Call for help if the burn is large, on the face or hands, or the person is in shock.
Cuts	Apply firm pressure with a clean pad, raise the limb, and then dress the wound. Call for help if bleeding is heavy or does not stop.
Fainting or heat exhaustion	Lay the person down with legs raised in a cool place, loosen clothing and give small sips of water when awake. Call 1122 if she does not recover quickly.
Choking	Encourage coughing. If she cannot breathe, give back blows, then abdominal thrusts if trained, and call 1122.
Allergic reaction	Ask about allergies. If there are breathing problems, swelling or collapse, call 1122 immediately and stay with her. Help her use her own adrenaline pen if she has one.
Serious injury or unconscious person	Do not move her unless in danger. Check breathing, call 1122 or 115, and follow the operator's instructions.

Every injury, however small, is recorded in the Security Incident Report (MEZ-FRM-005). A guest taken ill or injured is accompanied by staff until family or the ambulance arrives, and the Supervisor tells the Security Manager.

8.3 Emergency contacts

This list is displayed in the kitchen, at the host desk and in the staff room. Numbers were checked against public sources in October 2026 and must be re-checked before printing. Fill in the blank fields before use.

Service	Number	Notes
Police (Madadgar)	15	Threats, theft, violence
Fire Brigade	16	Fire, gas leaks
Rescue 1122	1122	Ambulance and rescue
Edhi Ambulance	115	Ambulance
Chhipa Ambulance	1020	Verify before printing
K-Electric (power faults)	118	Electrical faults and outages
Gas utility (emergency)	[to be filled]	Gas leaks and supply

Service	Number	Notes
Nearest police station	[name and number]	
Nearest hospital	[name and number]	
Building owner or landlord	[number]	
Security Manager	[number]	First internal contact
CEO	[number]	All high and critical incidents
Owner	[number]	Critical incidents
IT Manager	[number]	CCTV, alarm, devices

9. Incident Reporting, Escalation and Investigation

9.1 What counts as an incident

Theft or missing property, trespass, harassment or abuse of staff or guests, violence or threats, suspicious persons or objects, photographing guests without consent, injuries and illness, fire and near misses, damage, misuse of keys or access, CCTV misuse and unsafe conditions.

9.2 Reporting steps

1. Make everyone safe first and call emergency services (Section 8.3) if there is danger to life.
2. Tell the Supervisor immediately, in person or by phone. The Supervisor tells the Security Manager, and the CEO for medium or higher severity.
3. Complete the Security Incident Report (MEZ-FRM-005) before the end of the shift, and no later than 24 hours after the event, with facts only: time, place, people, what happened, actions taken and witnesses.
4. Do not discuss the incident on social media, in public or with anyone not involved. Do not delete or change evidence.

9.3 Severity and escalation

Severity	Examples	Who to inform	Time
Low	Minor hazard, lost item, rude guest, small cut	Supervisor	Same shift
Medium	Theft of small items, aggressive guest, minor injury, unauthorised male visitor in guest area	Supervisor, Security Manager	Within 2 hours
High	Harassment or threat, major injury, break-in, cash loss, CCTV misuse, fire put out	Security Manager and CEO	Immediately
Critical	Fire, serious injury or death, violence, weapon, kidnapping threat, major data or CCTV leak	Emergency services, then Security Manager, CEO and Owner	Immediately

The CEO decides on reporting to the police for non-emergency matters. Staff may always call the police themselves if there is danger. Escalation follows the levels in the General Office SOP, and incidents involving HR matters or harassment are also sent to the HR / Sales / Marketing Manager.

9.4 Investigation

1. Secure the scene and protect evidence. Export and save relevant CCTV footage before it is overwritten after 30 days.
2. The Security Manager (or the CEO, if the Security Manager is involved) takes written statements from those involved and witnesses, separately and respectfully.
3. The Security Manager reviews footage, registers and logs, and works with HR if staff conduct is involved, following the disciplinary process in MEZ-SOP-001.
4. A short investigation report is completed within 3 working days for medium incidents and within 5 working days for high and critical ones. It states the facts, cause, decisions and corrective actions.
5. The CEO approves the actions. The Documentation & Compliance Coordinator logs and tracks them until closed, and the learning is shared at the monthly review.

9.5 Support and protection

- Anyone who reports an incident or concern in good faith is protected from retaliation.
- Victims of harassment or violence are offered support, time off if needed and help to report to the police if they wish. Reports are kept confidential and shared only with those who need to know.

10. Opening and Closing Procedures

Opening and closing are always done by at least two staff members, and one of them is the Supervisor or a delegated senior team member. The logs are kept as part of the Daily Operations Report (MEZ-FRM-010).

10.1 Opening checklist

No.	Task
1	Two staff arrive together (by 9:00 AM). Check the outside of the building, doors and locks for damage or signs of break-in. If anything seems wrong, do not enter and call the Supervisor.
2	Disarm the alarm (if installed). Switch on lights and check CCTV is recording.
3	Check gas valves and electrical equipment for leaks, damage or odours before switching on.
4	Unlock the emergency exits from the inside. Check that all exits and routes are clear.
5	Check extinguishers are in place, and first aid and burns kits are stocked.
6	Check washrooms, prayer area, guest areas and reading corner for cleanliness and hazards, and check chairs and tables.
7	Count the cash float with a second person and sign for it. Check POS is working.
8	Run the opening hygiene and temperature checks (Operations SOP). Hold the shift briefing.
9	Check that the host and the First Aider and Fire Warden are named for the shift. Unlock the Main Entrance at 10:00 AM.
10	Complete and sign the opening log in the Daily Operations Report.

10.2 Closing checklist

No.	Task
1	Stop accepting guests at last order time (9:30 PM). Politely tell guests that the cafe closes at 10:00 PM.

No.	Task
2	At 10:00 PM, make sure all guests have left. Check washrooms, prayer area, reading corner and event area, including for forgotten items, and put them in the Lost Property Log.
3	Lock the Main Entrance. Make sure no unauthorised person is inside. Check that the Service Entrance is locked and bolted.
4	Switch off equipment and appliances not needed overnight. Turn off gas at the valve. Check no heating or candles are left on.
5	Clean and set up as in the Operations SOP. Take out the rubbish and secure the area where it is stored.
6	Count the cash with two staff members. Record it, place it in the safe and lock the safe. Complete the cash sheet.
7	Lock the store room, kitchen and cabinets. Put laptops and tablets in the locked cabinet.
8	Check that CCTV is recording. Set the alarm if installed, switch off lights, and lock up.
9	Complete and sign the closing log. Report any incidents, damage or faults.
10	Staff leave together by the safe exit, and use the arranged transport. The Supervisor confirms everyone has left.

11. Compliance, Review and Approval

11.1 Compliance checks

Check	Frequency	Responsible
Safety walk-through	Monthly	Security Manager
First aid kit and extinguisher check	Monthly	Security Manager and Operations Officer
CCTV and alarm function check	Monthly	IT Manager
Key Register and access review	Quarterly	Security Manager
Evacuation drill	Every 6 months	Security Manager and Fire Wardens
Asset Register check	Every 6 months	Security Manager and IT Manager
Fire equipment servicing, first aid refresher	Yearly / every 2 years	Operations Officer

11.2 Review and approval

This SOP is reviewed every 12 months, and after any high or critical incident, change in premises or change in law. Changes follow the review and approval process in Section 8 of the General Office SOP, and each version is recorded in the Master Document Register. Breaches may lead to action under Section 7 of the General Office SOP.

11.3 Revision history

Version	Date	Description	Author
1.0	01 Nov 2026	First issue	Security Manager

11.4 Approval
